DataBridge™ Software

Transaction Management for Vehicle Scales

METTLER TOLEDO

Gain Complete Control

Vehicle Weighing with DataBridge™

DataBridge software gives you complete control of your vehicle weighing. This intuitive data-management software processes weights quickly and accurately to keep traffic moving over your scales. It also stores detailed records of every transaction to make your billing, inventory control, and compliance easier.

Automate Your Process

Traditional transaction management has often involved hand-written tickets and manual record keeping. This not only slows down your operation but also opens it up to costly errors and fraudulent activity. DataBridge transaction-management software lets you eliminate manual tasks and securely automate weighing to speed up your processes.

Simplify Complex Transactions

DataBridge presents you with an easy-to-use graphic weighing screen. The live transaction summary allows your operators to view all data as it is processed. Manual search and filter helps you locate vehicle, material, and customer records quickly. Predefined data sets further streamline data entry and reduce error risk.

Centralize Data Management

Retrieve records quickly and easily for review, billing, and export: DataBridge securely stores every transaction so you can automate fully formatted reports in seconds. Plus, DataBridge lets you manage weighing operations of all sizes—even multiple scales at multiple sites. Install it as a shared network database to connect individual workstations.

Match your DataBridge software package to the requirements of your operation. Every package enables fast weighing, secure data-capture, and easy integration with your other systems. You can also upgrade DataBridge to expand its capabilities and connectivity as your business grows.

DataBridge™ SS automates your vehicle weighing using a PC and gives you control of one or two scales. The local database stores detailed weighing transactions to use with other software systems.

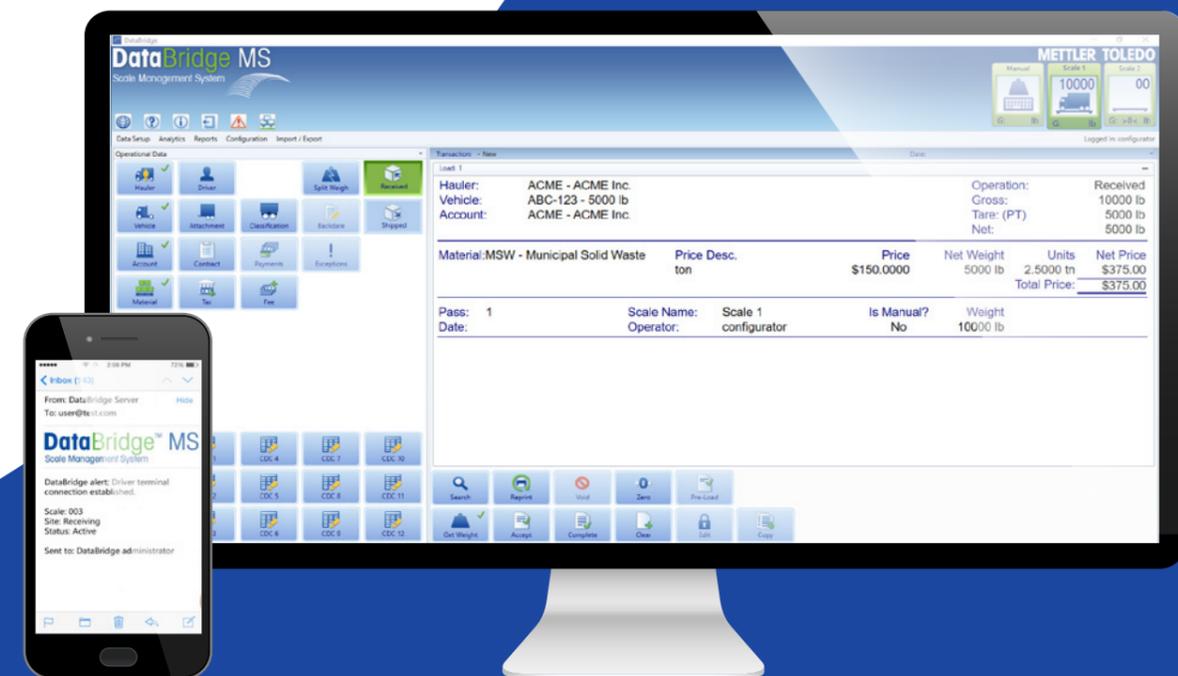

DataBridge™ SS
Scale House Software

DataBridge™ MS brings scalehouse software to larger operations and more complex transactions. Network installation lets workstations share data to speed up reporting and protect against fraud.

DataBridge™ MS
Scale Management System

DataBridge™ ES consolidates data across sites to centralize management. Fitting seamlessly into even the largest business, company-wide data sharing maximizes efficiency and productivity.

DataBridge™ ES
Scale Enterprise Solution

Simplify Vehicle Processing

Smooth, Intuitive Transaction Management

The intuitive user interface of every DataBridge™ software package ensures smooth processing with less user training. Additionally, DataBridge MS lets you customize the transaction screen, making it even easier to meet the needs of your operators and business.

Connect Every Step

The DataBridge™ Advantage

The value DataBridge can bring to your organization stretches far past your scale. DataBridge enables smoother processing at every step, and the visibility it offers provides insight into operational trends and protects you from fraudulent activity. You improve your weighing speed, scalehouse productivity, and overall profitability.

Relate to Your Customers Better

Give your customers a great experience: reduced wait times, smoother weighing, and custom tickets that can be emailed automatically.

Enhance Scale Operations

A sleek, intuitive user-interface inspired by modern point-of-sale systems speeds up transactions, reduces error potential, and makes training easier.

Maintain Control of Your Warehouse

Know precisely what is coming into and leaving your facility with access to real-time data shared on your network.

Secure Your Data

Transactions are managed in a powerful SQL database that can be deployed to one workstation or accessed from many.

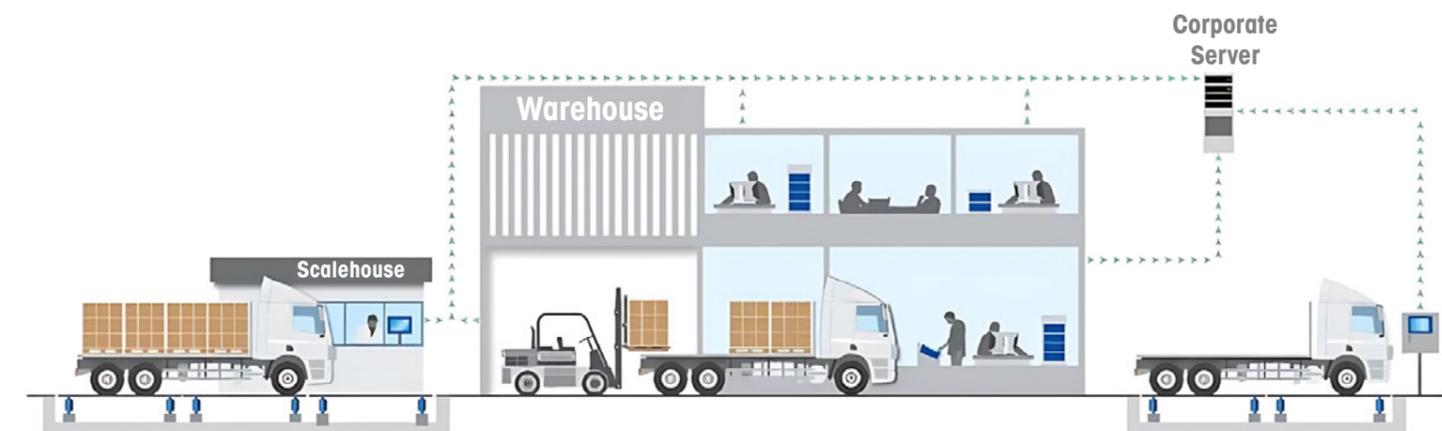

Get a Clearer Financial Picture

View and export complete records in various formats. Finance and accounting leverage real-time data to improve projections and manage cashflow.

Take Your Organization's Pulse

Executive management obtains impressive reporting capabilities on weighing processes, business trends, and scalehouse issues. They stay informed.

Automate Your Scalehouse

Fast, Safe, Sustainable Weighing

Enable faster throughput, seamless data collection, safer operation, and sustainable production by automating your vehicle weighing process.

► www.mt.com/automate-scalehouse

Transaction Management Software

Get rid of manual-processing roadblocks. DataBridge™ enables smoother transactions by speeding up your weighing process, reducing errors, and eliminating the risk of data manipulation.

► www.mt.com/VEH-DataBridge

Unattended Weighing

Unlock 24/7 operation and automated transactions with an unattended kiosk. Unattended weighing eliminates the need for a full-time attendant, reducing your overall operating costs.
